

It operates in a half-mile loop on the busy downtown Fremont East district, giving free rides to Sin City's tourists and gamblers. It's upper area is clear and bubble-shaped, allowing as many as eight seat-belted passengers to rubber-neck the sights as the vehicle travels along at 15 MPH.

There are many of the latest technical advances in the shuttle, allowing it to sense potential dangers from street light changes, traffic and pedestrians. Also, during the trial period, there will be a qualified employee aboard to make sure all systems work well and safely. Now, if they could only design a slot machine that actually pays off.
