

She's a brightly-colored metal talking info source on wheels with an animated face resembling a Shirley Temple doll. She scoots around Seattle-Tacoma Airport in Washington state. The cute robot doesn't sing On The Good Ship Lollypop, but gives current airport and flight data to arriving passengers.

Her purpose, in addition to helping people navigate the busy airport, is to reduce confusion and delay in security lines and boarding. The girl robot, called Tracey, also answers questions and, when requested, is able to respond in six languages.
