

Gone are the days of the one-armed bandit and other coin-operated mechanical machines. Today's casinos feature all kinds of electronic slots that give you colorful displays while taking in many of your paper dollars. However, things they are a'changing!

The newly opened, five-star i-Hotel in Taouan claims to be the world's first total e-gambling mecca. Each guest room is equipped as a mini-casino, with two multi-purpose computers featuring electronic versions of the traditional casino slot machines, as well as fun computer games, movies and regular TV programs.

There are also computerized gambling machines in the super-modern hotel lobby and other areas of the luxury destination. Quoted room rates are listed from about \$50 a night.
